## DETAILED ACTION

### *Drawings*

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference sign(s) not mentioned in the description: Reference character "15" is shown in figure 1 but not mentioned in the specification. Reference characters "14", "16", "17", "18", "19" and "23" are shown in figure 2 but not mentioned in the specification. Correction is required.

### *Specification*

2. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.
3. The following title is suggested: **Method and Apparatus for Operating a coin actuated Entertainment Automat.**

Art Unit: 3711

4.

**Content of Specification**

- (a) Title of the Invention: See 37 CFR 1.72(a). The title of the invention should be placed at the top of the first page of the specification. It should be brief but technically accurate and descriptive, preferably from two to seven words.
- (b) Cross-References to Related Applications: See 37 CFR 1.78 and M.E.P.. § 201.11.
- (c) Statement Regarding Federally Sponsored Research and Development: See M.E.P.. § 310.
- (d) Reference to a "Microfiche Appendix": See 37CFR 1.96(c) and M.E.P.. § 608.05. The total number of microfiche and the total number frames should be specified.
- (e) Background of the Invention: The specification should set forth the Background of the Invention in two parts:
  - (1) Field of the Invention: A statement of the field of art to which the invention pertains. This statement may include a paraphrasing of the applicable U.S. patent classification definitions of the subject matter of the claimed invention. This item may also be titled "Technical Field."
  - (2) Description of the Related Art: A description of the related art known to the applicant and including, if applicable, references to specific related art and problems involved in the prior art which are solved by the applicant's invention. This item may also be titled "Background Art."
- (f) Brief Summary of the Invention: A brief summary or general statement of the invention as set forth in 37 CFR 1.73. The summary is separate and distinct from the abstract and is directed toward the invention rather than the disclosure as a whole. The summary may point out the advantages of the invention or how it solves problems previously existent in the prior art (and preferably indicated in the Background of the Invention). In chemical cases it should point out in general terms the utility of the invention. If possible, the nature and gist of the invention or the inventive concept should be set forth. Objects of the invention should be

Art Unit: 3711

treated briefly and only to the extent that they contribute to an understanding of the invention.

- (g) Brief Description of the Several Views of the Drawing(s): A reference to and brief description of the drawing(s) as set forth in 37 CFR 1.74.
- (h) Detailed Description of the Invention: A description of the preferred embodiment(s) of the invention as required in 37 CFR 1.71. The description should be as short and specific as is necessary to describe the invention adequately and accurately. This item may also be titled "Best Mode for Carrying Out the Invention." Where elements or groups of elements, compounds, and processes, which are conventional and generally widely known in the field of the invention described and their exact nature or type is not necessary for an understanding and use of the invention by a person skilled in the art, they should not be described in detail. However, where particularly complicated subject matter is involved or where the elements, compounds, or processes may not be commonly or widely known in the field, the specification should refer to another patent or readily available publication which adequately describes the subject matter.
- (i) Claim or Claims: See 37 CFR 1.75 and M.E.P.. § 608.01(m). The claim or claims must commence on separate sheet. (37 CFR 1.52(b)). Where a claim sets forth a plurality of elements or steps, each element or step of the claim should be separated by a line indentation. There may be plural indentations to further segregate subcombinations or related steps.
- (j) Abstract of the Disclosure: A brief narrative of the disclosure as a whole in a single paragraph of 250 words or less on a separate sheet following the claims.
- (k) Drawings: See 37 CFR 1.81, 1.83-1.85, and M.E.P.. § 608.02.
- (l) Sequence Listing: See 37 CFR 1.821-1.825.

Application/Control Number: 09/491,779

Art Unit: 3711

5. This application does not contain an abstract of the disclosure as required by 37 CFR 1.72(b). An abstract on a separate sheet is required.

6. On page 8, reference character "2" refers to a 'symbol display device' on lines 3 and 5. On the same page, lines 18 and 22, reference character "2" refers to a 'symbol game device'. Correction/clarification is required.

*Claim Rejections - 35 U.S.C. § 102*

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

7. Claims 1-8 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Vancura.

Vancura discloses Gaming Machines with Bonusing. In his game he teaches the playing of a bonus game in a secondary machine adjacent to a primary machine. Vancura's invention substantially teaches the limitations as claimed.

Application/Control Number: 09/491,779

Art Unit: 3711

Vancura teaches:

Referring to Claim 1, 3 & 7

- that the primary machine acts as a traditional slot machine (col. 18, lines 22-24).
  - that the primary gaming machine can be a suitable gaming machine, such as, slot, poker, keno etc.;
- and
- the accumulating of winnings in an award meter (col. 17, lines 44-54).

Referring to Claim 2 & 8

- a secondary machine (claim 1);
- a bonus qualifying signal, to play a bonus game on the secondary machine, when a predetermined combination of symbols is obtain (col. 18, lines 24-28);
- determining the winning values and accumulating winnings in the specific winning machine (claim 1).

Referring to Claim 4

- a bonus qualifying event determined after the primary machine is activated (col. 3, lines 18-20 and col.4, lines 55-64).

Application/Control Number: 09/491,779

Art Unit: 3711

Referring to Claim 5 & 6

- a secondary machine (claim 1);
- the use a processor to facilitate all the functions of the primary (master) and secondary (slave) machines (see figure 50);
- a bonus/jackpot (claim 12);
- collecting the game results of the secondary machine in the primary machine ( col. 16, lines 62-67);
- that the primary machine can be used as a slot, poker or keno machine (col. 5, lines 14-20)
